SAFETY WARNINGS AND PRECAUTIONS

When using your Fan Speed Controller, basic safety precautions should always be followed to reduce the risk of personal injury and damage to equipment. Read all instructions before using this product.

1. Observe work area conditions. Do not expose to moisture. Do not operate in damp or wet locations. Keep work area well lit.
2. Maximum amp requirement. Do not use any tools or devices that require more than 3 amps with this speed controller.
3. Keep children away. Children must never be allowed in the work area. Do not let them handle machines, tools, or extension cords.
4. Check for damaged parts. Before using Fan Speed Controller, any part that appears damaged should be carefully checked to determine that it would operate properly and perform its intended function. Any part that is damaged should be properly repaired or replaced by a qualified technician. Do not use Fan Speed Controller if any switch does not turn on and off properly.
5. Use proper size and type extension cord. If an extension cord is required, it must be the proper size and type to supply the correct current to the tool without heating up. Otherwise, the extension cord could melt and catch fire, or cause electrical damage to the Fan Speed Controller.
